SUMMARY

I am motivated and detail-oriented aspiring engineer with strong skills in **Python programming, data science, microcontrollers, and sensor interfacing**. I have hands-on experience in developing **automation systems, and simulation-based technical projects**, demonstrating strong problem-solving and analytical abilities. With a keen interest in **artificial intelligence, robotics, and data-driven technologies**, I am eager to apply my technical expertise to innovative and real-world engineering challenges.

EDUCATION

Dayalbagh

Educational Institute

Bachelor of Vocational (AI & Robotics)

2024 - 2027

EXPERIENCE

• Fresher

0 Years Professional Experience

- Motivated AI & Robotics student with knowledge of Python, AI, ML, and IoT.
- Hands-on in robotics, automation .
- Collaborated on multiple academic projects applying AI and IoT concepts .
- Actively seeking roles to contribute in AI-driven projects, leveraging skills in Python, A.I. and Robotics.

ACADEMIC PROJECTS

Disaster Management website

- Built a system to predict disasters using weather data.
- Enabled real-time emergency reporting and safe evacuation guidance.
- Included a donation module to support NGOs and affected communities.
- Designed with multilingual support and a user-friendly interface.

SKILLS

- Programming: Python
- AI/ML: OpenCV, TensorFlow, Tkinter
- Web Development: HTML, CSS, JavaScript
- Hardware/Robotics: Arduino, Sensors, IoT Automation
- Tools: Git, VS Code, TinkerCad

ACHIEVEMENT

- Idea shortlisted in Smart India Hakathon of 2024 and 2025.
- Artificial Intelligence Fundamental-Dayalbagh Educational Institute.
- Certified in Artificial Intelligence Fundamentals– Anudip Foundation
